

PAWS

REPRESENTED BY

REHASENSE
more than mobility

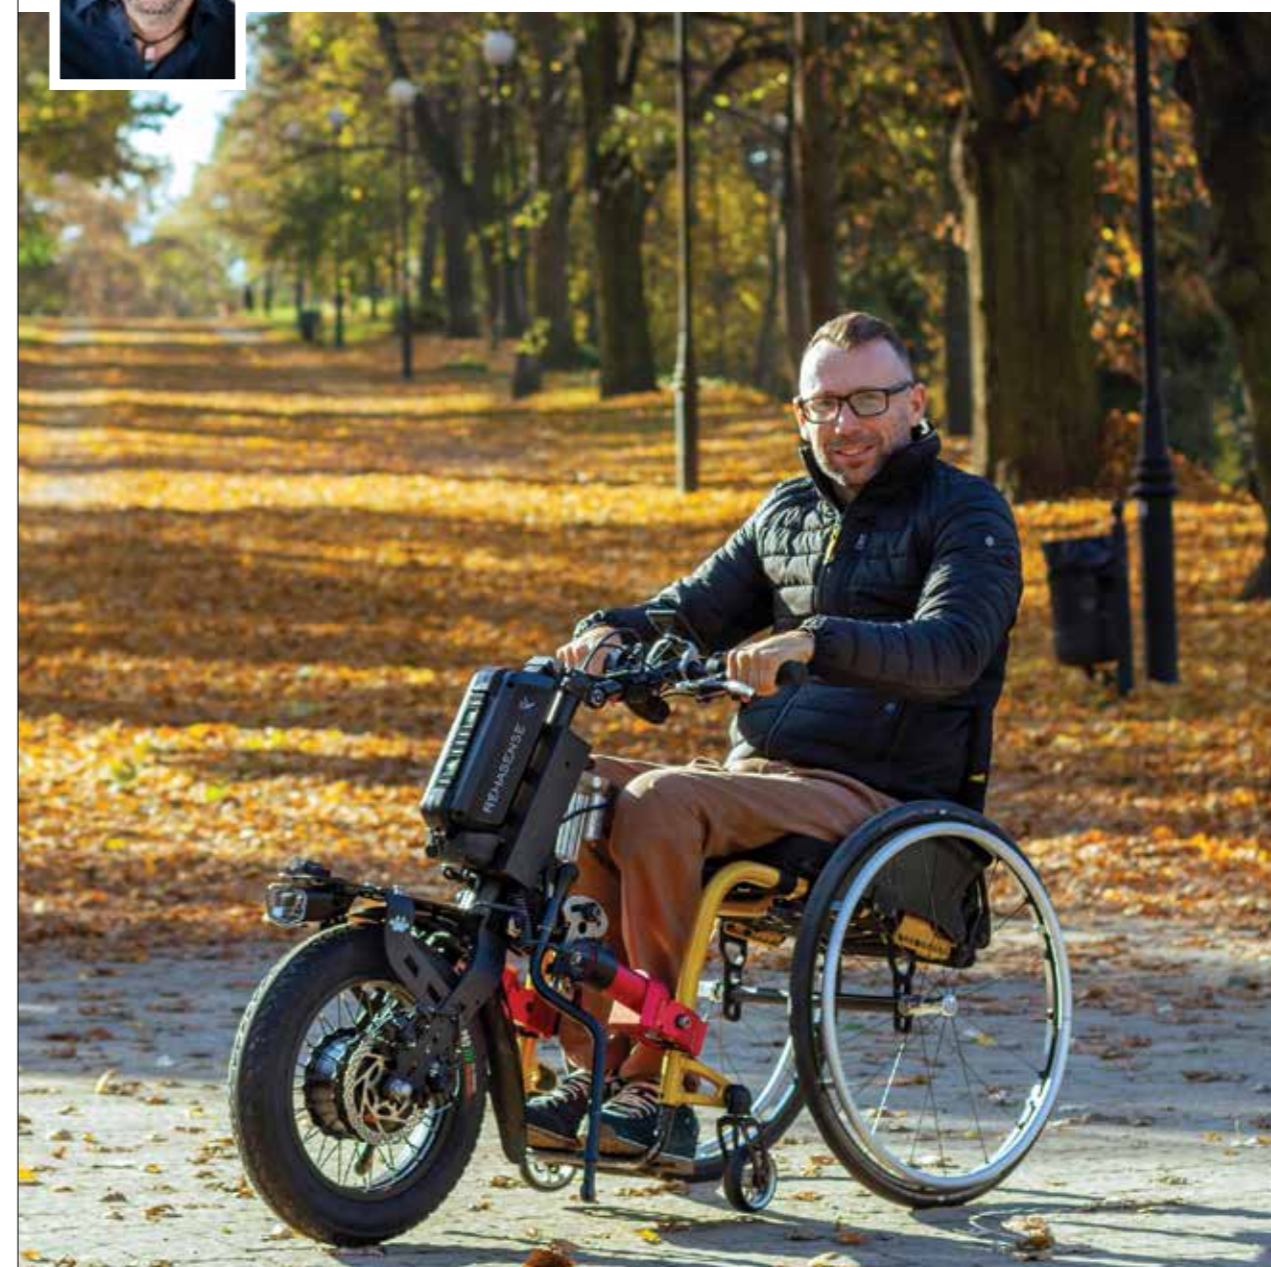

PAWS

„GREAT INNOVATION”

Tomasz Biduś, Professional wheelchair rugby player and Brand Ambassador

„For me as a wheelchair user it is immensely important that I have products that meet my needs and support me in my mobile life.

As an athlete you push yourself to your limits and always try to give your best.

PAWS is so far the most innovative power-add on system for wheelchairs. It gives you a fantastic feeling of dynamics and unlimited mobility.“

PAWS

POWER ASSISTED WHEELCHAIR SYSTEMS? SAY PAWS!

PAWS IS THE WORD,

but primarily it is the best power add-on for your wheelchair. It combines ergonomics and functionality with good looks. With PAWS your manual wheelchair becomes an exciting vehicle, allowing you to be independent when getting to work, going shopping, or on a trip. This wheelchair power add-on is a great alternative to the car. Just grab life with your PAWS. PAWS will be for you what you want it to be – combine pleasure with function. Driving PAWS will become your hobby. Every PAWS creates its own story of freedom – meet family and friends, participate in more activities together or go for a solo adventure. Get more from mobility. Discover the PAWS possibilities in the following pages.

CITY

EXPERIENCE A FULL LIFE WITH PAWS

Let PAWS be a part of your everyday mobility. Get to work with ease and take care of the shopping on the way home. Seize your daily opportunities with confidence. Get busy with PAWS!

PAWS City may be ordered with either a 12" or 14" front wheel and is designed primarily for city travelling. Choose 12" for the smoother roads or 14" if you expect a few more bumps. With a 1m turning circle, it is great indoors as well. It likes hard ground and even surfaces, but can also cope with uneven pavement and curbs.

PAWS CLAMPS

do not need any frame alteration or additional add-ons to your wheelchair. Manual Clamping and Lifting takes only a few seconds to get going.

Configuration shown: 12" wheel size, Tetra Controls, Manual Easy Clamps.

CRUISER

3... 2... 1... PAWS!

Choose PAWS Cruiser and have more fun. A great solution for a variety of mobility purposes. Whether it is around town or along a forest trail, this model is for you. The big 16" drive wheel eats up the bumps for a really smooth ride.

Get your PAWS on the track and easily overcome the obstacles in the terrain.

Just do more, further, faster and feel the freedom of the road with PAWS.

Configuration shown: Standard Controls, Automatic Easy Clamps

EFFORTLESS DOCKING WITH PAWS

With Automatic Easy Clamps just roll your wheelchair into the clamps and press the button for automatic clamping and lifting to the driving position. From Start to go in 12 seconds!

TOURER

DISCOVER NEW PLACES WITH PAWS

Do you like going to new places? With PAWS you can feel confident even in unexplored terrain. PAWS Tourer has the longest wheelbase so while the big wheel overcomes roots and uneven terrain, it also makes a smooth ride while touring. PAWS Tourer is the true off-road stager. With a 20" wheel and 4" fat tyre, you will easily get to places that would be difficult for other models. Designed primarily for off-road purposes, it is not afraid of sand, gravel, stones. Get your PAWS in the dirt!

TETRA CONTROLS

allow you to drive easily, even with diminished upper extremity strength and control.

Configuration shown: Tetra Controls, Automatic Easy Clamps

ERGONOMICS

PAWS takes convenience to the next level. Engineers, ergonomists and therapists have worked together to create for you the most convenient product on the market. We did it! PAWS leads with the easiest and the most universal docking system. Long lever arms and a Quick Release Clamp make manual clamping quick and easy. Auto clamping and lifting is as easy as the flick of a switch – a real breakthrough solution. You'll get multiple of possibilities to set up the handlebars to afford the best fit for you. When choosing PAWS you can customise the set up with different configurations of clamps, steering, wheels, and accessories for optimal use and fit – especially beneficial for quadriplec/tetraplegic users.

Parking position

Touring position

City position

CLAMPING

It is very easy to connect the PAWS to the wheelchair, with two innovative choices of Easy Clamps – Manual or Automatic. Another unique feature of the PAWS is that you do not need any wheelchair modifications or add-ons to connect both. After using PAWS, your wheelchair remains as it is. All you add is PAWS!

Manual Clamps with long levers for easy engaging

Automatic Clamps for effortless engaging

Automatic clamps: Good for people with hands/ arms disabilities.

LIFTING

When manual lifting, simply push the handle bars away from the body to lift the the front of the wheelchair. When choosing Auto Lift, you don't need to use upper body strength to connect PAWS with the wheelchair. Auto Easy Clamp and Auto Lift will automatically connect you to driving position. PAWS – it's the clever way to go.

HANDLEBARS

Two handlebar set-ups allows many to control PAWS. Choose best one for your purposes – Standard Controls or Tetra Controls. There are also multiple of possibilities to set up handlebar position to make the best fit for you.

Standard Controls

Tetra Controls

SPEED

Standard there are 2 forward speed modes* with a further 3 available as a special order**. Additional modes are Walk Mode, Cruise Mode, Traction Mode and Reverse. (*maximum speed is 15 km/h; **speed up to 28 or 32 km/h is only for special orders for qualified users). Please note: PAWS may be delivered differently in your country to meet local regulations.

Forward/Reverse Mode

Walk Mode
Set the speed to a constant 4 km/h

Cruise Control Mode
Driving speed can be set without the need to hold the throttle in position.

Traction Mode
This function is useful if the surface is slippery or on slopes, from a stationary start.

BRAKES

Braking is by the front disc brake, controlled by two brake levers mounted on the handlebars. The brakes can be operated by one hand or both, if heavy braking is needed.

WHEELS

Each model has its own type of wheel – which differ in size and purpose. PAWS City 12"/14" is good for the streets or even indoors with its short wheelbase and tight turning circle, while PAWS Cruiser 16" is an all-rounder, good for mid to hard terrain. PAWS Tourer 20" – comes with two tyre widths – 2.5" – an all purpose tyre, and 4" for more rough terrain.

LIGHTING

A powerful, multifunction headlamp has an automatic option – the lights come on automatically in the evening or in tunnels. Other manual adjustments are possible.

WATERPROOF

PAWS has an IP54 waterproof rating so is not afraid of rain, puddles and moisture. Go on, get PAWS out!

DISPLAY

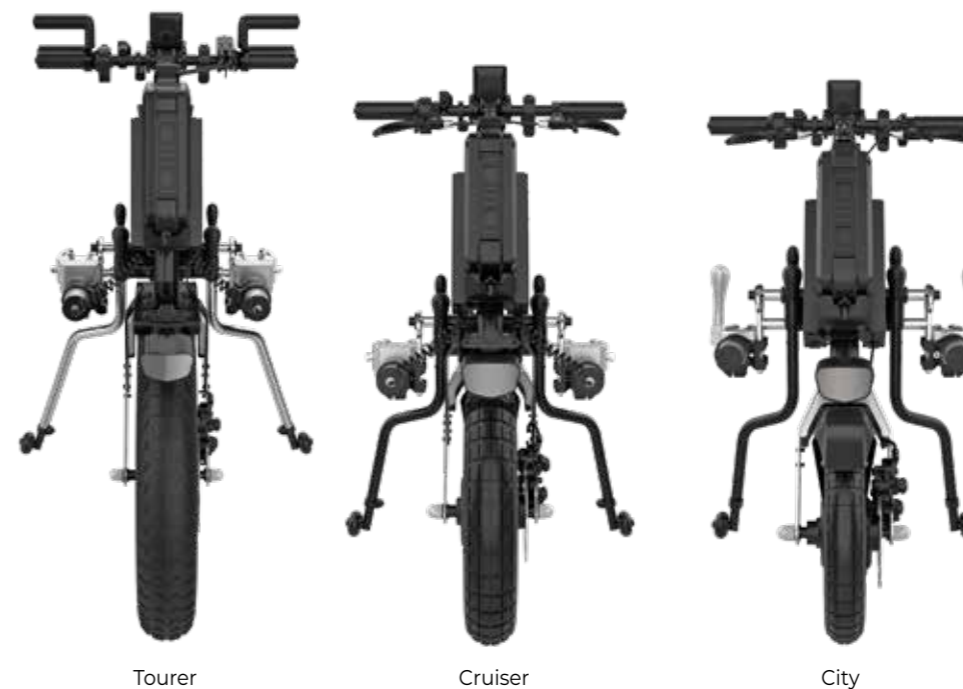

The Driver Display shows important driving data like speed, distance, time, power, driving mode and other mode settings. Brightness is automatically adaptive to the amount of ambient light. The Display is centrally mounted on the handlebars and may be rotated to the best position.

UNIVERSAL

The range of adjustment in the clamping system allows a wide range of folding and rigid frame chairs to be fitted. Quick Release clamps make it easy to disassemble for easier handling during transport. It's how PAWS is done. PAWS wins again!

BATTERY

For a full charge, the Lithium Ion battery only needs up to 5 hours of charging. On a full charge you can reach a range of up to 40 km (depending on terrain, driver weight and model chosen). An IATA compliant "flying" battery is also available for when you take your PAWS on a flight. Battery changes are easy and quick, so when it's running low, you can swap for a full one and PAWS keeps going, and going...

Tourer

Cruiser

City

CUSTOMIZATION

Set up your PAWS model to matches your style and needs. During the process of selecting best configuration you may consider: three models of PAWS (12', 14" 16" and 20" wheels), manual or auto clamping and lifting, two models of handlebar control, even the size or type of wheel. Finally, fine tune the handlebar set-up and select your driving mode.

ACCESSORIES

ACCESSORISE YOUR RIDE FOR MAXIMUM UTILITY

CARRIERS

Carrier Bag – upgrade your carrier basket with the Carrier Bag with the zip-up top and side compartments. Your drink bottle will fit snugly in the side pockets. It has velcro closures to keep it in position.

Carrier Bag

Carrier Basket – an easy clip on and off basket that allows you to load up for your trip. With sturdy heavy guage steel rod construction, it is dip coated to prevent corrosion.

Carrier Basket

TYRE INFLATOR

The Smart Tyre Inflator has a built-in rechargeable battery that drives a mini compressor for inflating tyres. Apart from automatically sensing the set pressure limits, the device can provide USB power for external devices and has a light function. Very useful for those longer journeys!

BATTERIES

The standard Lithium Ion 48V11.2Ah battery delivers a powerful 556 Watt hours of use – universal across all models. With a convenient strap handle, it easily clips into the retainer and is secured in place with it's own key and lock.

The recharging time from flat is 5 hours. The smart charger cuts out once full charge is reached.

The battery has a power level indicator on top for powering-up as well as checking the level. The Flight Battery (300 Wh) has a lower power level so that it can be carried on passenger planes according to IATA. It is important to give the Airline carrier at least 48 hours when travelling with a battery.

Battery inserting

PACKING

A durable packing carton and inserts is provided to protect the PAWS from damage during transport. It's recommended to keep this in reserve, in case the device needs to be transported at a later date.

Width Adjust-ment Rods: Enable fitting to a range of different wheelchair widths

OUR RECOMMENDATION FOR YOUR SAFETY:

please wear a helmet when riding PAWS.

Tools: A full set of adjusting tools is provided with each PAWS

ICON WHEELCHAIRS...

Configuration shown:
 ICON 30 transport wheelchair
 + PAWS City 12" wheel size,
 Standard Controls, Manual Clamp

BEST FIT FOR PAWS

ICON 30 FAF

FIXED ANTERIOR FRAME, LIGHTWEIGHT,
 FOLDING ALUMINIUM WHEELCHAIR

ICON 30 FAF – Fixed Anterior Frame. This x-brace folding wheelchair is constructed from high strength aluminium tubing with strengthened side frames to provide a strong connection point for the PAWS power add-ons.
 Apart from this, ICON 30 chairs come with a high degree of fitting adjustability and options to optimize for individual requirements.

TECHNICAL DATA

Max. load capacity	125 kg
Total weight	13 kg
Net weight	9 kg
Seat width	40 (45) cm
Seat depth	40 (45) cm
Legrest angle	70° / 80° / 90°
Rear wheel	24"
Front wheel	5" (6", 7")

BENEFITS OF THE REHASENSE WHEELCHAIRS

- Reinforced side frame for strength
- Stronger wheels for durability & comfort
- Cambered for greater stability
- Adjustable backs for better fit

Configuration shown:
 ICON 60 active wheelchair
 + PAWS CRUISER 16" wheel size,
 Standard Controls, Automatic Clamp

ICON 60

OPEN FRAME, LIGHTWEIGHT,
 ALUMINIUM RIGID WHEELCHAIR

The ICON 60 wheelchair "grew up" with PAWS. This chair was the main test chair in the development of PAWS and has evolved as a strong partner for PAWS. Standard with adjustable seat positioning, flip down push handles, a folding back and tension back straps, it is ready to roll with PAWS.

TECHNICAL DATA

Max. load capacity	120 kg
Total weight	9 kg
Net weight	6,5 kg
Seat width	40 (36, 38, 40, 42, 44) cm
Seat depth	40-46 cm (1.5 cm increment)
COG adjustment	6 positions available (1.3 cm increment)
Rear wheel	24"
Front wheel	3" (4", 5")

INNOVATIVE POWER ADD-ON'S FOR WHEELCHAIRS

3 models – 6 functions – more than 30 patents pending!

CITY

Self-Centering Tracking
Straight and sure

AUTO CLAMP

Automatic fixation
Clamping and unclamping in seconds

AUTO LIFT

Automatic lifting
Completely effortless lifting

TETRA HANDLES

Special Tetra handles with braking brake
Full control without exertion

AUCKLAND, NEW ZEALAND OCTOBER 2020

Dear customers,

Two years ago the journey began. Our vision was to develop one of the world's most extraordinary and innovative electric traction devices for wheelchair users that would redefine the feelings of independence and freedom.

Since then, our development team has been hard at work and now it's here. I hope you enjoy discovering new places with our power assisted wheelchair system "PAWS".

Please feel free to share your best moments, experiences and photos with us via marketing@rehasense.com.

Best regards from New Zealand.

Roger Dutton,
CEO Rehasense Group
